PROJECTS

HoopDB | *Java 17, Javalin, Oracle Database, JDBC, Maven, Gson, HTML/CSS/JavaScript* github.com/fordevsingh/hoopdb

- Built a basketball league management web app with a Javalin REST API, Oracle relational schema, DAO layer, and browser UI.
- Modeled players, teams, coaches, venues, seasons, matches, and performance records with SQL scripts for sample data, procedures, sequences, and triggers.
- Implemented CRUD and reporting workflows for player search, team and coach management, box scores, career averages, all-time team wins, and season standings.

Hotel Management System | *Java 17, JavaFX 21, Maven, FXML, CSS* github.com/fordevsingh/hotel-management-system

- Developed a JavaFX desktop application for hotel rooms, customers, bookings, checkout, and billing from a styled dashboard.
- Designed layered Java modules with models, service logic, repository persistence, backup snapshots, validation helpers, and controller-driven UI events.
- Added room availability tracking, booking validation, checkout bill generation, dashboard summaries, serialized backup recovery, logging, and a live clock thread.

OpenBook | *JavaScript, PDF.js, Vite, IndexedDB, HTML/CSS* github.com/fordevsingh/OpenBook

- Built a local-first PDF reader that opens user-selected PDFs in the browser using PDF.js rendering and a Vite frontend setup.
- Implemented IndexedDB storage for recent files, document metadata, reading progress, zoom level, and page bookmarks with automatic eviction of older files.
- Created a reader interface with collapsible navigation, recent files, document outline, bookmark panels, page controls, zoom actions, sample loading, and dark mode.

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL, HTML/CSS

Frameworks/Libraries: Javalin, JavaFX, PDF.js, Vite, Gson, FXML

Databases/Storage: Oracle Database, JDBC, IndexedDB, file-based persistence, serialized backups

Developer Tools: Git, GitHub, Maven, VS Code, IntelliJ IDEA
